

Heritage Style Country Gates, Stock Equipment, General Welding & Fabrication

Portable Horse Yards

We have two different designs depending on your requirements...

Hinged Panels

These portable horse yard panels have a bit of flex in them and are better on uneven ground. They self connect with no pins to lose. Pictured are 2 x 4m, 1 x 3m panels.

| | |
|------------------------------|---|
| 4m, fold down to 2m panels | \$130 |
| 3m, fold down to 1.5m panels | \$120 |
| Pair of float mounts | \$95 (not required if yards are freestanding) |

Single Panels with Pins

A much sturdier set up, these portable float yard panels lock together with concealed pins so panels can't be lifted apart by your horse. Prices include pins.

| | |
|--------------------|--|
| 1.8m Single Panels | \$90 (longer panels cost an extra \$2.00 per 10cm) |
| Set Float Mounts | \$75 (not required if yards are freestanding). |

Extras

For transporting the panels on the side of your float ...

| | |
|-----------------------------------|-------|
| Fixed hanging brackets (pair) | \$100 |
| Removable hanging brackets (pair) | \$275 |

- All orders are custom made so design can be modified to suit, e.g. for small ponies.
- We can add extra bars and change the length of your horse yards to suit individual floats / needs.
- Pins are set flush so there are no hooks or protrusions to get caught on.
- Legs have steel flags so the panels can be pegged down (pegs not included)
- Joints are notched, not squashed so they're much stronger and panels are neater to look at.
- Float panels are cleaned so there are no sharp slaggy bits to catch on or cut you or your horse.
