

Heritage Style Country Gates, Stock Equipment, General Welding & Fabrication

Hay Feeders

Various designs depending on your requirements...

Hay Rings

3 Piece Hexagonal Hay Ring

- **3 piece Hexagonal Hay Ring**— (pictured) Comes apart into three easy to carry sections which are held together with star droppers. The droppers (not included) are knocked into the ground, level with the top of the ring to anchor the ring (so no sharp protrusions) and stop stock from pushing it around. The ring is easy to move around and you don't need heavy machinery or a large vehicle to move it about

Solid Hay Ring

- **1" pipe straight uprights** (pictured)
- **1" pipe straight uprights + mesh** (as above but with 50x75mm mesh inserted into the bottom section)
- **1" hoop / crown design**
- **1" hoop / crown + horse mesh** (50 x 75mm)

Hay Mangers

Hay Manger

- **Hay Manger**—1.1m² x 600mm high.
Horses: 75x50x5mm mesh cradle will hold several small square bales
Calves or cows 100x150x5mm mesh
- **Alpaca / Deer / Goat Manger** - holds a single square bale. Browsing animals can pick from the underside of the manger.

Note: Supplements or hard feeds can be fed from a plastic feeder slung from the mesh sides of either of the above mangers.

Alpaca Hay Manger

Other Feeders:

Hay Cradles—round or square bale
